ENDOLight

Convenience without compromising in Illumination

Vorotek was founded in 1971 by Australian ENT surgeon Dr John Vorrath. For over forty years Dr Vorrath has been developing and producing head worn fully integrated optical systems with illumination. His drive has always been to provide users with products that enhance their capability for examination, instrumentation and procedures.

The Vorotek ENDOLight is replacing fibre optic lighting systems for endoscopes. The intensity & quality of the illumination is matched and not being tethered by a fibre optic cable or power lead is a major benefit.

Surgical Quality LED Illumination

Vorotek's 5 Watt LED (50,000 hours operating life) produces a brilliant **120,000 lux**. The intensity and consistency of the illumination is comparable to fibre optic systems.

Dimmable LED Illumination

The dimmer function provides 7 evenly spaced levels of illumination.

Endoscope Compatibility

For flexible and rigid Endoscopes.
Fits directly to **Pentax** endoscopes.
Adaptors available for **Olympus** and **Storz** endoscopes.

Interchangeable

The EndoLight can be used with any Vorotek Battery Pack e.g. the Vorotek O Scope Battery Pack

Ease of Use

Portable, compact and light weight, emphasizing simplicity and durability.

Portable Power Supply

The 10hr Battery Pack (lithium Ion), either belt or pocket worn, provides 10 hrs of "on time" (at the maximum level of illumination).

Durable

Outstanding reliability and durability results from experience and knowledge acquired by Vorotek over 40 years.

Designed & Manufactured in Australia
